

IN THE CLAIMS:

Please cancel claim 2 without prejudice or waiver. Please also amend claims 1 and 4, and add new claims 8-11, so that a complete set of the pending claims will read as follows:

1. (Currently Amended) A notebook computer with a web pad equipped display, comprising:

a base unit; and

a display, which is detachable from the base unit and can close to and open from the base unit when jointed to the base unit, wherein the display comprises:

a display panel;

a motherboard which is electrically connected to the display panel;

a microprocessor which is situated on the motherboard; and

a telecommunication device which is electrically connected to the motherboard[[]];

wherein the display becomes an independent web pad when the display is detached from the base unit, and the notebook computer is formed when the display is jointed to the base unit.

2. (Canceled)

3. (Original) A notebook computer according to claim 1, wherein the display further comprises:

a memory unit which is situated on the motherboard.

4. (Currently Amended) A notebook computer according to claim 1, wherein the display further comprises:

a stylus with which the user uses to touch the display panel to input control signals, wherein the stylus is insertable ~~can be inserted~~ into a stylus slot of the display.

5. (Original) A notebook computer according to claim 1, wherein the display panel is a Liquid Crystal Display (LCD).

6. (Original) A notebook computer according to claim 1, wherein the telecommunication device is a wireless telecommunication device.

7. (Original) A notebook computer according to claim 1, wherein the transmission of the telecommunication device is a Bluetooth transmission.

8. (New) A web pad equipped display attachable to a base unit of a notebook computer, the web pad equipped display comprising:

a display casing, which is detachable from the base unit and can close to and open from the base unit when attached to the base unit;

a display panel situated inside the display casing;

a motherboard situated inside the display casing and electrically connected to the display panel;

a microprocessor which is situated on the motherboard; and

a telecommunication device electrically connected to the motherboard for linking the web pad equipped display to a network,

wherein the web pad equipped display is an independent web pad when separated from the base unit, and the notebook computer is formed when the web pad equipped display is jointed to the base unit.

9. (New) A web pad equipped display according to claim 8, wherein the display panel is a Liquid Crystal Display (LCD) panel.

10. (New) A web pad equipped display according to claim 8, wherein the telecommunication device is a wireless telecommunication device.

11. (New) A web pad equipped display according to claim 9, wherein the wireless telecommunication device is based on Bluetooth technology.
